Aqua-Tap – New Tapping Kit

Aqua-Tap Pro-T (Tiger)

Porter Associates is pleased to announce a new addition to the Aqua-Tap line of innovative and efficient tapping machines.

Aqua-Tap Pro-T (Tiger) Tapping Machine combine the additional strength and battery life of a DeWalt 36 Volt Drill, with three additional corporation adapters and coupon retaining pilot bits; making these new kits the strongest, most complete tapping machines in the industry. The Aqua-Tap Pro kit delivers the following upgrades to the standard Aqua-Tap kit:

- The most powerful cordless drill on the market – DeWalt 36 Volt
- 11 commonly used IPS & CTS Corp Adapters. (3 more than standard kit).*
- Cobalt & Tungsten carbide coupon retaining pilot bits.

* 3/4" & 1" IPS adaptors and 1-1/4" CTS adaptor

In addition to the above upgrades, the Aqua-Tap Pro-T (Tiger) kit substitutes one of the standard carbide tipped holes saws with one Tiger Cutter, per size. The metallic pipe only Tiger Cutters are specifically designed to devour dozens of DIP and CIP taps quickly and efficiently.

The new kit is packaged in a tough, durable yellow Aqua-Tap Pro carrying case.

Please call with any questions.
